Coastal Plan Map

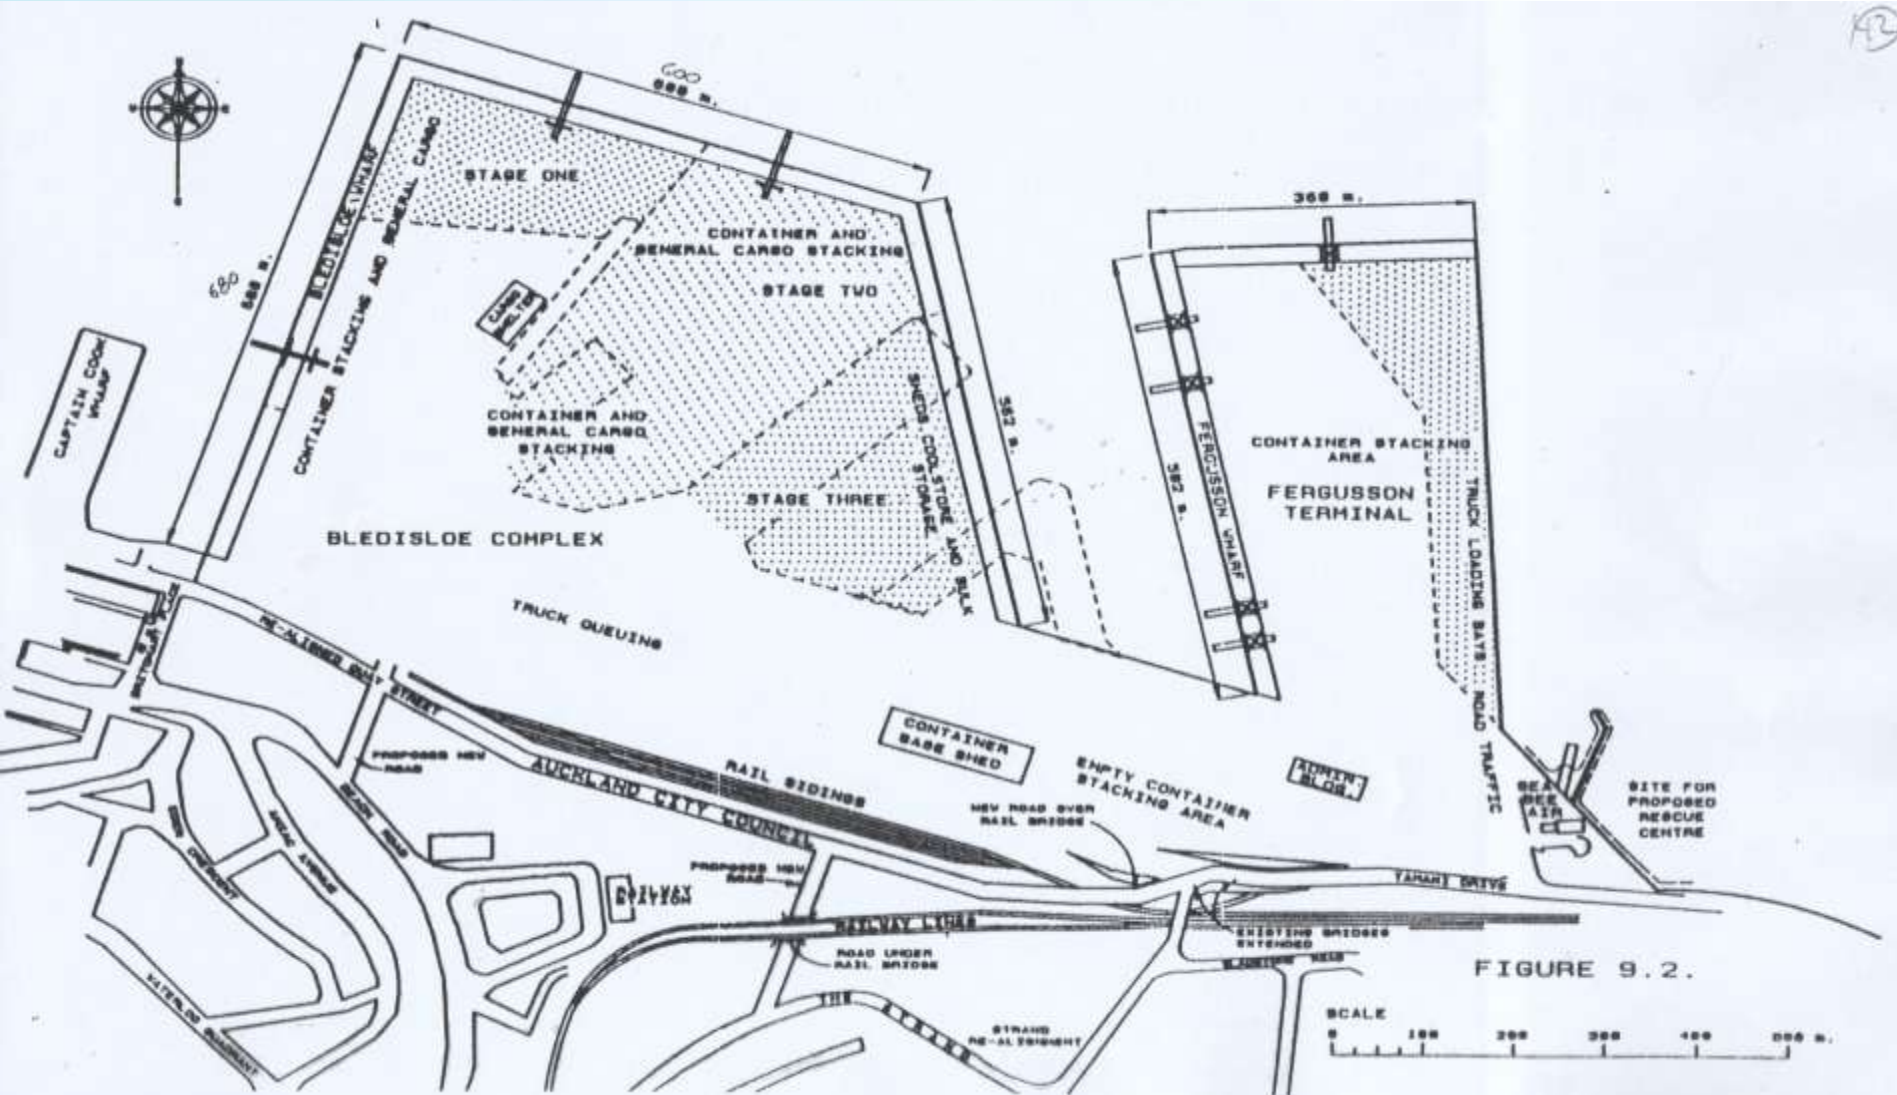

Regional Plan: Coastal

- “.... The continued efficient operation and development of the Port Management Areas for port activities is of strategic and economic importance to the region and the nation....”
- “....The development of new port facilities for port activities within Port Management areas shall be considered more appropriate than development outside of these areas.”
- “....reclamation shall be recognised as an option for port development to meet necessary future cargo handling, passenger and other needs within the Port Management areas....”
