<p>Berth windows and vessel schedules – Berth windows remain suspended. Labour supply – This remains tight and we are continuing to make every effort to employ and train additional staff. This however is not a quick process. We are still working to a continuous 24/7 operation targeting 3 cranes during daytime and 2 at night. Where we can supplement additional capacity relative to the hours of work and fatigue risk management we are. This is as well as providing suitable coverage for road, rail and yard ancillary work.		
Yard Capacity – As of today, the main terminal is approx. 90% utilised and Automation yard at 38%.		
<p>Road Services – Weekend operations ran well. Overall, between Friday and Sunday we have delivered out 1,247 import containers via road and 225 import containers via rail. Majority of the road deliveries were handled on Friday – 667 import containers. Average truck turn times on Friday were at 23 minutes. Saturday and Sunday average truck turn times have not exceeded 24 minutes.</p> <p>Today's R&D operations are running well. There is limited flexibility around VBS bookings, so please continue to monitor the pool. We will be assisting with VBS for fully cleared import DG and reefer containers as well as export cut off. For Late Reveal approvals please apply through Customer Service Team.</p>		
Productivity – still operating at lower than normal productivity levels.		
Rail Services – working well
