

Operational Update

21 June 2023

Overall Operational Status	
<p>Key points: Container terminal yard utilisation is 72% today.</p> <p>Terminal operations have experienced some congestion and delays over the past week due to higher-than-normal unplanned absenteeism and restrictions with the unavailability of one of the three terminal berths due to infrastructure works. This has resulted in failure to meet all on time berth window departures.</p> <p>We expect over the next week our labour situation should stabilise but remains subject to winter illnesses.</p> <p>The infrastructure works will continue until end September.</p> <p>Please continue to monitor POAL Website for vessel movements and cargo receipt windows.</p>
