Fuel Adjustment Factor (FAF)

Update, effective 1st May 2026

2nd April 2026

Port of Auckland has in place a formula for calculating the Fuel Adjustment Factor (FAF) to compensate our business as and when the price of fuel fluctuates. This process has been in place since August 2006 and we have continued to keep customers informed of the trend to the changing purchase price of fuel.

The calculation used to determine the Fuel Adjustment Factor is based on current pricing, working in bands of +/- 20%. If the six-week average triggers a move up or down, the following formula applies with four weeks' notice of change.

The 6-weekly average for FAF as at 3rd April 2026 will move into the +101% to +120% range. Based on this information, FAF will be charged as per the schedule below, effective 1st May 2026 being four weeks from tomorrow.

Prior FAF changes and effective dates are detailed in the schedule below.

The FAF tier applicable on the date of the vessel arrival will be applied.
